Connect Google Calendar

See your Google events next to your courses, and copy your CourseCadence schedule into Google.

Connecting Google Calendar works in two directions. Your Google events show on the CourseCadence calendar so you see everything in one place, and you can turn on sync to copy your deadlines, study sessions, classes and personal events into Google. To see your schedule in Apple Calendar or another app instead, use **Calendar subscription** on the same page.

Connect Google Calendar

1. In the web app, click the person icon in the top-right corner.
2. Click **Profile settings**.
3. Click **Integrations**.
4. Under **Google Calendar**, click **Connect Google Calendar**.
5. In the Google window, choose your Google account and allow CourseCadence to use your calendar.

You return to **Profile settings** and see **Google Calendar connected.** with the Google account you used. Events from your main Google calendar, from the past month to about four months ahead, now show on the **Calendar** page marked **Google Calendar**. They're read-only: you can view them in CourseCadence but not change them, and nothing in Google changes. CourseCadence reads them again each time you open the calendar, and plans study sessions around them.

> **Note:** Signing in with **Continue with Google** doesn't connect your calendar. Connect it here even if you sign in with Google.

Sync your schedule to Google

1. Go to **Profile settings** > **Integrations**.
2. Under **Sync my schedule to Google**, click **Turn on sync**.

CourseCadence creates a calendar named "CourseCadence" in your Google account and copies in your deadlines, study sessions, classes and personal events from the past month to six months ahead. After that, it updates the Google calendar every 15 minutes. To send a change right away, click **Sync now**. You see **Synced to Google Calendar.**

Sync only goes one way. Changes you make to the "CourseCadence" calendar in Google are overwritten at the next sync, so make changes in CourseCadence.

If you see **Reconnect below to grant write access before turning this on.**, click **Reconnect**, allow access in Google again, then click **Turn on sync**.

Turn off sync or disconnect Google Calendar

1. Go to **Profile settings** > **Integrations**.
2. Under **Google Calendar**, click one of these:
   - **Turn off sync**: stops copying your schedule to Google. Your Google events still show in CourseCadence.
   - **Disconnect**: stops sync and removes your Google events from the CourseCadence calendar.

After **Turn off sync**, the button changes back to **Turn on sync**. After **Disconnect**, the section shows **Connect Google Calendar** again.

> **Important:** Both options delete the "CourseCadence" calendar from your Google account, including any changes made to it there. Your other Google calendars aren't touched.
