Find your way around the iPhone app

Learn what each tab in the iPhone app is for and where to find the things you do most.

The iPhone app has five tabs along the bottom: **Dashboard**, **Calendar**, **Courses**, **Follow-ups** and **Me**. It uses the same account as the web app at coursecadence.app, and everything syncs both ways: a course you add on your phone is on the web, and a change you make on the web shows up on your phone without refreshing. To install the app, see **Get the iPhone app and sign in**.

Watch the video for this guide at docs.coursecadence.app/find-your-way-around-the-iphone-app.

Check your week on Dashboard and Calendar

Dashboard is your home screen. Until you add a course, it says **Let's set up your semester.** and shows the **Add your first course** card and the **Get set up** checklist. Once you have a course, it shows:

- **Welcome back** with your first name, and the week you're in.
- Three numbers for this week: **Study blocks this week**, **Completion rate** and **Assignments due now**.
- A row of course chips. Tap a course to show only its dates, or tap **All courses** to show everything.
- **Upcoming syllabus dates**: dated work from all your syllabi, soonest first. Tap an item to see its details.

Calendar shows your classes, graded items, study sessions and personal events.

1. Tap **Calendar** in the tab bar.
2. Tap a view:
   - **Month**: the whole month.
   - **Week**: the week strip, with yesterday, today and tomorrow by the hour underneath. This is the default. Swipe the timeline to move three days.
   - **Day**: one day by the hour.
3. (Optional) Tap the arrows to move back or forward, or tap **Today** to come back to today.
4. (Optional) Tap **Courses:**, select the courses you want to see, then tap **Done**. Select **All courses** to show everything again.

Tap an item to open its details, where you can mark it done. To add something, tap **+ Add**, then **Course event** or **Personal event**. To get study sessions for the week ahead, tap **Plan next week**, check the **Proposed study sessions**, and tap the **Add** button. See **Use the calendar** and **Plan study sessions** for the details, which work the same way as on the web.

If you're offline, the calendar shows **Offline · saved calendar**: the last copy you opened. You can look, but you can't make changes until you're back online.

Manage your courses and follow-ups

Courses lists your courses under **Your courses**, with how many follow-ups each one has, or **All set**.

- Tap **Upload syllabus** to scan a syllabus. See **Scan a syllabus on your phone**.
- Tap **Add manually** to add a course without a syllabus. See **Add a course by hand**.
- Tap a course to open its **Course report**: the course details, **Class meetings**, its follow-ups and everything CourseCadence took from the **Syllabus**. Tap the pencil button at the top to edit the course. See **Review and edit a course**.

Follow-ups lists everything CourseCadence couldn't tell for sure from your syllabi, such as a date it had to estimate. The number on the tab is how many are still open, including study sessions you missed.

1. Tap **Follow-ups** in the tab bar.
2. Tap a follow-up. It opens in a sheet.
3. Answer it in the sheet. Your calendar updates straight away.

Follow-ups are grouped into **Overdue**, **This week**, **Later** and **No date yet**. When none are left, the tab says **All caught up**. See **Resolve your follow-ups**.

Manage your account from Me

Me shows your name and email at the top. Tap them to open **Profile settings**, where you can change your **Personal** details, **Study planning**, **Notifications**, **Integrations** (such as Google Calendar) and **Account** settings. See **Manage your profile and reminders**.

The other rows on **Me**:

- **Course schedule**: a list of your class meetings and study sessions.
- **Notifications**: messages from CourseCadence, with a count of unread ones.
- **Help & FAQ**: answers to common questions.
- **Send feedback**: tell the CourseCadence team about a problem or an idea.

- **Privacy Policy** and **Terms of Use**.
- **Sign out**: signs you out of the app on this iPhone.
