Get the iPhone app and sign in

Install CourseCadence on your iPhone and sign in with the account you use on the web.

The iPhone app uses the same account as the web app at coursecadence.app, so your courses, calendar and follow-ups are already there when you sign in. You can sign in with an emailed code or link, a password, or Google. If you don't have an account yet, see **Create your account and get started**, or tap **Sign up** in the app.

Watch the video for this guide at docs.coursecadence.app/get-the-iphone-app.

Download the app

1. On your iPhone, open the App Store.
2. Search for "CourseCadence".
3. Tap the download button next to CourseCadence, then open the app.

On an Android phone, get CourseCadence from Google Play the same way.

> **Note:** CourseCadence is in the App Store and on Google Play from Tuesday, November 17, 2026.

Sign in with an email code or link

1. Open CourseCadence. The **Sign in to your planner** screen opens.
2. Enter your **Email**.
3. Tap **Email me a sign-in link**.

   The **Check your email** screen shows the address the email was sent to.
4. Open the email from CourseCadence on this iPhone, and do one of these:
   - **Code**: go back to CourseCadence, enter the 6-digit code in **Sign-in code**, then tap **Sign in**.
   - **Link**: tap the link in the email. It opens CourseCadence.

You're signed in. Next, see what opens first.

If the email doesn't arrive, check your spam or promotions folder. After the countdown on **Resend in** finishes, tap **Resend email**. A resent email has a new code, and the old one stops working. To fix a typo, tap **Use a different email**.

If the screen says **This email does not have an account yet. You need to sign up first.**, tap **Sign up** next to **Don't have an account?** instead.

The app keeps you signed in until you sign out. There's no **Stay signed in** option on the iPhone.

Sign in with a password or Google

To use a password you set on the web or in the app:

1. On the **Sign in to your planner** screen, tap **Use password instead**.
2. Enter your **Email** and **Password**.
3. Tap **Sign in**.

If you forgot it, enter your **Email** and tap **Forgot password?**. Open the reset email on this iPhone and tap the link. On **Choose a new password**, enter a **New password** and **Confirm password**, then tap **Update password**.

To use Google:

1. On the **Sign in to your planner** screen, tap **Continue with Google**.
2. Choose your Google account and follow Google's prompts.

If your email already has a CourseCadence account, **Existing account found** opens. Tap **Connect** to link Google to it, so you can sign in either way and keep your data.

See what opens first

If you have a free trial or membership, your **Dashboard** opens. The first time, the app asks you to **Enable notifications** for reminders. Tap it to get reminders on this iPhone, or tap **Not now**.

If your account has no free trial or membership yet, the **Keep your semester on course** screen opens instead:

1. Do one of these:
   - **Decide later — start 1-month free trial**: starts your free trial. No card is needed. This shows only if you haven't had a trial yet.
   - **Choose membership**: opens the CourseCadence plans page from the web app in a browser window inside the app. When you close it, the app checks your access.
2. If you started a free trial, **Free trial active** shows the date it ends. Tap **Continue setup**.

Your **Dashboard** opens. If you pay on the web and the app still says **Your account does not have active access yet.**, wait a minute, then tap **Check access again**.

To start adding courses, see **Scan a syllabus on your phone**.

Sign out

1. Tap **Me** in the tab bar.
2. Tap **Sign out** at the bottom of the screen.

The **Sign in to your planner** screen opens. Reminders stop on this iPhone until you sign in again.
